Sing Move Play

Click, Capture, Create

Turn everyday musical moments into rich fun filled musical experiences. Step into the child's world, capture it on image and explore it musically. This workshop will

- Offer tools to creatively capture special moments on camera e.g. sliding down the slide, making jelly.
- Apply the Orff process to those images to bring them alive through singing, moving and playing instruments.
- Participants need to bring a device to take photos with.

Presenter Jo Charman

Music with Movement to Assist Brain Development

In a world where children are moving less , teachers are finding children's readiness for learning is delayed. Children need to develop coordination of their body parts across three midlines, in order to move more securely and gain confidence to undertake challenges.

Janet will share a repertoire of music to motivate children to move and develop their sense of midlines—and you don't have to be a rock star to teach it.

Presenter Janet Channon
